Your Interconnection Advantage

I m a g i n e

ONE CONNECTION POINT,
Infinite
customers.

AFFORDABLE "PAY-AS-YOU-GROW" USAGE FEES.

BellSouth SS7

HUB SIGNALING SERVICE PROVIDES

everything you need.

Only pay for what you need. Ready to take full advantage of the SS7 telecommunications signaling network? You are now. BellSouth SS7 Hub Signaling Service offers a usage sensitive rate structure that's designed to save you money. Here's how it works. When you use the network to inquire of a database or set up a call, you pay a usage fee. When you're not using the network, you don't pay any usage fees. How's that for a fair deal?

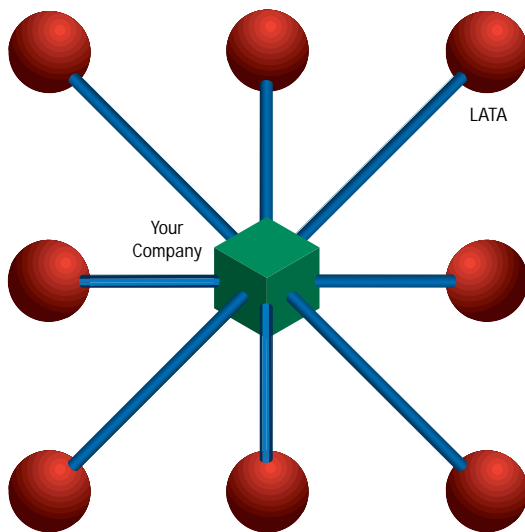

A single connection point means you spend less and get more. BellSouth SS7 Hub Signaling Service gives you access to all of our central offices with as few as one connection point. The result: complete regional connectivity at a significant cost savings in call setup and termination, as well as maintenance. (That's good for you and your customers — not so good for your competition.)

Three-way diversity gives you one more way to compete (and win). In today's competitive environment, low cost isn't enough to win over the fickle hearts of customers. They want more than a tempting offer. They want service they can count on. They want to get connected and stay that way.

To that we say, "No problem." BellSouth SS7 Hub Signaling Service is designed with built-in transmission path diversity. So you won't have to worry about your network going down.

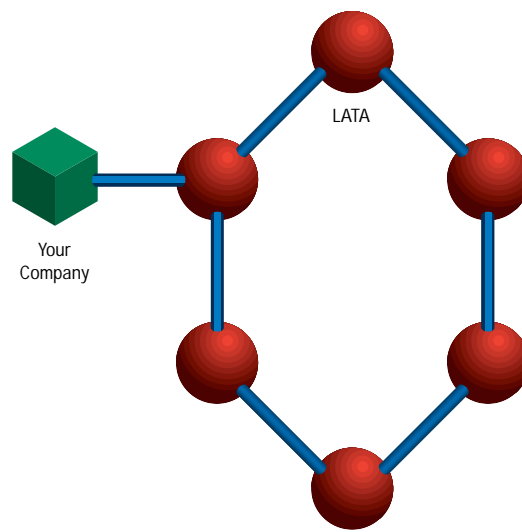

Use the SS7 signaling network as your gateway to anywhere. With our SS7 Hub Signaling Service, you can access databases both inside and outside the network simply by using your existing links with BellSouth. You save time, headaches and, of course, money.

BellSouth SS7 Hub Signaling Service MAKES A GOOD THING even better.

SS7 Signaling Network

To access customers within a particular LATA, you would have to connect with each BellSouth interconnection point within that LATA.

SS7 Hub Signaling Network

Now, by simply connecting with a single LATA interconnection point, you can access customers in that LATA or any other LATA within the BellSouth region.

Better connections begin with BellSouth.

For more information about getting connected to all the advantages of our SS7 Hub Signaling Service, please contact your BellSouth account team representative at 888-878-1045.
