

BellSouth SPA DS0 Digital and Voice Grade Services

Your Basic Network Building Block

With BellSouth SPA DS0 Digital and Voice Grade services, you can choose the right transmission types and speeds for your networks every time. DS0 circuits provide digital and voice grade options—fitting your need for the local and interoffice channel, voice and data applications. Whether your focus is on long distance, Internet or area networks, these Special Access products complete your network picture.

The DS0 Family

BellSouth SPA DS0 Digital Data: Digital channels provide for the transmission of synchronous serial data at rates of 56 or 64 Kb/s, which can be channelized into 2.4, 4.8, 9.6, or 19.2 high speed Kb/s. Options include Public Packet Switching Network Interfaces, Central Office Bridging and BellSouth SPA Customer Reconfiguration service.

BellSouth SPA DS0 Voice Grade: Voice grade channels provide for the transmission of analog signals within an approximate bandwidth of 300-3000 Hz, and may be terminated with two-wire or four-wire. Voice and Data Bridging, Line Conditioning and Customer Reconfiguration service options are available.

BellSouth SPA WATS Lines: WATS channels provide service from a customer premise to a WATS serving office for toll-free 8XX ten-digit screening. WATS options include rotary or multifrequency tone addressing provided over effective two-wire, four-wire or DS1 transmission paths.

Interconnection Advantages

- To ensure you receive the most reliable services, the **Service Installation Guarantee** and **Service Assurance Warranty** apply, as set forth in applicable tariffs.
- Gain the product knowledge you need and learn to identify ideal network applications when you attend **BellSouth Special Access carrier training courses**.
- Take advantage of special pricing programs through our **Flexible Payment Plans**.
