

## BellSouth® MegaLink®

Service

LINK UP  
with speed  
**flexibility**  
AND RELIABILITY.

# High Speed. High Capacity. HIGH APPEAL.

Want to attract and maintain even more wireless customers? BellSouth® MegaLink® service can help you do just that. This DS1 dedicated digital transport service is designed to offer high-speed (1.544 Mbps), high-volume, ultra-reliable communications between the end office and cell site or the end office and mobile switching center. You get the savings and flexibility that are an inherent part of advanced digital technology. Plus, you get the coverage, reliability and security you've come to expect from BellSouth.

**Keep your competitive edge.** In the wireless business, reliability is paramount. So instead of microwave, why not go with digital transport service you can count on — no matter how long the loop, no matter what the weather. In the unlikely event of failure, BellSouth MegaLink service ensures quick restoration. You'll also appreciate the fact that there are no line-of-site requirements, which often preclude the use of microwave.

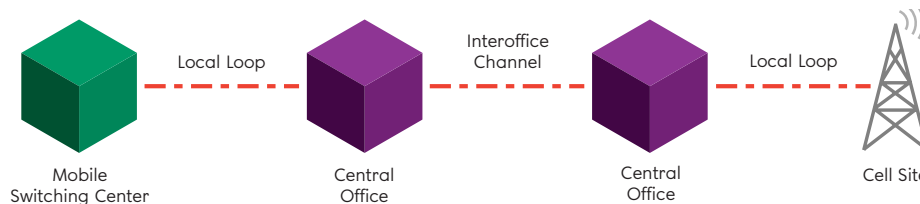

• **BellSouth Interconnection Services**

*Your Interconnection Advantage<sup>SM</sup>*

Of course, you also get the benefit of working with a single provider and a single point of contact whose only goal is to help you succeed. With no additional need for contractors and technicians, installation is fast and worry-free. Everything you need is provided by BellSouth. And that's great news, considering we also happen to have the broadest coverage available in our region (over 21 million access lines throughout the Southeast).

**The more traffic you have, the more reliability you need.** As your business grows, your reliability should grow right along with it. That's why BellSouth MegaLink service is such a smart choice for the long run. By connecting it with BellSouth® SMARTRing® service, you get the added reliability of SONET ring architecture. By linking it with BellSouth® LightGate® service, you get the benefits of a fiber-based DS3 digital transport service that's designed to handle even greater speeds and increased capacity.

#### MEGALINK SERVICE POINT-TO-POINT

**Better connections begin with BellSouth.** For more information, please contact your BellSouth Interconnection Services Account Team Representative, or call 1-888-878-1045. Or look us up on the World Wide Web at [www.interconnection.bellsouth.com](http://www.interconnection.bellsouth.com).
