¹AT&T Southeast ("AT&T") proposed these unimpaired wire centers in the Change of Law dockets. In Tennessee, AT&T modified the business line counts per the TRA's ruling, and these modifications resulted in no change to the unimpaired wire centers. In Kentucky, AT&T is still awaiting commission approval of its proposed wire centers. Orders for delisted UNEs in these wire centers will be processed in accordance with the CLEC's Interconnection Agreement.
